

ParScore v7.0 System Requirements

To install and run ParScore software, you must have the proper computer hardware and operating system. If you attempt to install ParScore software on an unsupported operating system, you receive an error message and are unable to install. The requirements are different depending on which scanner you are using, and what action you are performing.

To install or uninstall ParScore the user must have Administrator Rights.

Scanners	PC Hardware	Operating Systems
iNSIGHT 20 iNSIGHT 30	Pentium[®] processor: 2 GHz 32-bit (x86) or 64-bit (x64) minimum System memory: 2 GB minimum (3 GB recommended for Windows 7; 4 GB recommended for documents longer than 14" and/or higher resolution) Hard drive space: 40 GB hard drive with at least 20 GB of available space Monitor at 1024 x 768 or higher resolution USB 2.0 connection	Windows 7, 32-bit and 64-bit Editions Windows Vista [®] Business Edition or greater, 32-bit Edition only SP1 or greater Windows [®] XP Professional SP3 or greater All Windows hotfixes for the service pack must also be installed.

System Notes

- The Fast User Switching function of Windows 7, Windows Vista and Windows XP is not supported by ParScore. Only one instance of ParScore can be running on a PC at one time, even when under separate user accounts using Fast User Switching.
- The latest version of the associated Scanner Utilities must be installed before ParScore can be installed and run. Refer to the Scanner Utilities Release Notes for installation before installing ParScore.
