

Testing and Assessment

The Perfect Companion For Automated Tests

Now educators have the complete package to easily and quickly develop and manage student records and test information, analyze test outcomes and report their scores.

ParScore

ParScore is a comprehensive, easy-to-use test scoring software solution. It features an electronic gradebook, subtesting capability, user-defined mastery reports, and district-wide test score management.

Teachers can now score up to 26 versions of tests with up to 200 questions each and evaluate up to 26 responses per item. With ParScore, teachers can easily create a gradebook and reporting folder that includes attendance tracking for each student.

They can even import information in a comma-separated file format from other applications.

ParScore gives instructors more time to do what they do best—teach. Plus, they have the added benefit of tools to monitor individual student growth and their understanding of course material.

ParScore Is At The Top Of The Class In Flexibility

ParScore users become believers because it's so comprehensive, yet flexible. Teachers can easily develop and manage student records and test data. Customized class rosters can be created and attendance readily tracked.

Many tracking, viewing and data manipulation options are available. Grading criteria is user-defined. Scores and grades can be reported as Raw, Percent, Stanine, T-Score, Z-Score, Percentile, and User-defined T-Score.

Student test results can be merged from standardized tests so performance can be compared across classes or schools district-wide. Mastery reports can be created to compare performance by user-defined demographic data such as gender, socio-economic, ESL and Title I. PS roster data can be exported as well.

ParScore also features “error marking” scoring. This allows instant scoring and bubble-sheet marking by the scanner while simultaneously posting the data to the ParScore gradebook.

What You Gain With ParScore

Students enjoy the instant feedback, precision and accuracy of ParScore. Your interest in their test and quiz outcomes will surely be an incentive for learning and classroom participation. So, in the end, the automation of testing and scoring can actually give you more time for good old hands-on teaching.

How ParScore Fits Into The System

ParSystem is Scantron’s integrated suite of powerful software modules that allow you to create, administer, and score tests on paper, via networks or over the Internet.

ParSystem’s three ingredients—ParTest, ParTest Online, and ParScore—all fit into Scantron’s overall student achievement package.

With ParTest, teachers can develop multi-format tests from numerous item banks.

ParTest Online enables test takers to test over networks and via the Internet.

ParScore completes the suite allowing educators to manage student records, analyze test outcomes and score reports.

More Than 30 Comprehensive Reports Available

Mastery Report	Progress Reports	Item Analysis
Subtest Reports	Roster Reports	Attendance Reports
Student Profile Reports	Student Test Reports	Class Response
Error Log	Enrollment	Score Distribution
Grading Criteria	Course List
