Performance Series® Goes to School

A complete solution for school-level diagnostic testing

As a school administrator, you know you need reliable diagnostic testing data to make effective educational decisions. Your teachers need the feedback to adjust instruction, and parents need the reassurance of understandable results to track their children's progress. Our Performance Series School-Size Solution can help.

What is Performance Series?

Performance Series provides reliable, valid, and norm-referenced, computer-adaptive assessment. Rigorously created by our Assessment Services team, these assessments deliver statistically valid results that provide vertical growth mapping.

When administered at regular intervals, Performance Series' scaled score provides a "yardstick" that measures student growth throughout the school year. Continuing to use Performance Series regularly during a student's academic career provides effective longitudinal tracking across grade levels.

For more than 15 years, Performance Series has supported charter, public, and private schools; districts; states; and supplemental education providers across the United States.

Choose 1, 2, 3, or 4 Subjects

Subjects	Grades
Mathematics[1]	K–12[3]
Reading[2]	K–12[3]
Language Arts	2–8
Science	2–8

[1] Includes Matemáticas en Español (grades 2–9), Algebra (1 & 2), Geometry.
[2] Includes Lexile® scores.
[3] K-2 Mathematics and Reading includes professionally recorded audio to support students learning to read.
