# Accelerate remediation and mastery with netTrekker®

Combining assessment data that identifies students' needs with easy access to targeted learning resources that effectively address these needs is the path to real impact on learning outcomes. Scantron has partnered with Knovation® to offer convenient access to netTrekker's digital resources. These resources help teachers and students answer the "Now What?" question that arises after they analyze assessment data.

## The Right Resources for Every Student, Every Time

Scantron's assessment solutions, Achievement Series® and Performance Series®, are now integrated with netTrekker. Assessment data is directly connected to netTrekker's recommendation and delivery of targeted digital resources aligned with each standard to meet different students' needs, accelerating the path to remediation and mastery.

netTrekker connects teachers and students to the industry's leading digital resource library with more than 360,000 resources that are expert-curated, tagged and fully aligned to state and Common Core standards, ready for teaching and learning. These resources are categorized according to 19 types and 57 characteristics, so users can find just what meets their needs to create engaging learning experiences.

The resources are regularly reviewed and updated so users can feel confident that they are accessing the most up-to-date information. Now, educators can quickly and easily find resources for all students or groups based on current subject-level ability.

***Just because teachers are required to teach the same standards doesn't mean they have to teach each student in the same way with the same materials. Every student, every teacher, every class, every school is unique—Scantron® assessment solutions and netTrekker are designed to meet these individual needs.***

## The netTrekker Value

**General education:** Differentiated instruction helps all students achieve. The combination of Achievement Series, Performance Series and netTrekker allows educators to target the class or student ability level and deliver material on target.

**ELL/ESL:** The English Learners Theme in netTrekker is specifically designed for English language learners and their teachers. This dedicated area offers resources in multiple languages and leverages netTrekker's dictionary/translation feature.

**Below or above grade level:** By linking to netTrekker from Performance Series' Suggested Learning Objectives report, which targets the student's ability level instead of the grade level, students with abilities above or below their grade level will have resources appropriate for their learning needs.

**Reading challenges for special needs:** The Read Aloud feature in netTrekker provides text-to-speech support for students who need audio reinforcement. All sites also have readability ratings clearly marked and are easily refined from 1-5.

### Integration

The Scantron assessment solutions and netTrekker are integrated to allow targeted instruction directly from individual state- or Common Core-aligned standards or provide full access to the comprehensive suite of grades, subjects, and tools available.

- **Web-to-web interface**
- **Single sign-on (no need to remember multiple usernames)**
- **Immediate results for immediate action**

### For Teachers

This combination saves time by tying assessment results directly to recommended state- or Common Core-aligned materials.

**Connecting Scantron's nationally recognized assessment solutions with netTrekker's recommendation and delivery of digital resources closes the gap in the remediation and mastery cycle. In one solution, each step is aligned to standards and addresses unique student needs to create targeted learning experiences that result in improved outcomes.**

### For Students

This combination provides on-target instruction that is current, accurate, and engaging at each student's individual level.

### Location

Direct access within Achievement Series and Performance Series to state- or Common Core-aligned material available through the Instructional Resources button located alongside standards and objective statements in various group or individual reports.

General access is available under Instructional Resources main menu tab available from all pages.
