The Managed Print Services Association has recognized Scantron Technology Solutions as the 2019 Best Independent MPS Provider. The MPSA consists of more than 600 member organizations spanning 26 countries including the U.S. It is a non-profit organization with an independent board.

**Reduce costs and improve productivity with Managed Print Services**

Most firms do not manage print volume or expenses, yet printing is often the third largest expense after payroll and facility costs. They also don’t recognize the impact of highly preventable printing issues on the helpdesk team. What if your IT staff could focus more on value-adding issues and less time reacting to printer outages, paper jams and toner needs? Asset management also takes time. What if you have multiple printer models, leases and service agreements?

**Find Savings and Free Up Your IT Staff**

With MPowerPrint, you can strategize plan printer fleet management, rein in consumables costs, monitor all devices, and enjoy just-in-time replenishment of consumables. A qualified STS Field Service Technician responds to onsite service needs promptly.

**Manage costs and experience less downtime.**

MPowerPrint uses secure, state-of-the-art printer-monitoring software that supports strategic fleet planning. See comprehensive data including fleet inventory, device utilization, color vs. monochrome page volumes, and service history.

By outsourcing printer fleet management, your staff can focus on other priorities while your finance personnel receive the real, tangible data they need to understand your print-related costs.

**Productive Staff and Happy Customers**

When a printer is down, productivity can slow to a crawl. MPowerPrint can reduce your downtime, save money, and help you prevent lost opportunities.

**Protect Your Fleet Investment with Nationwide Onsite Support**

STS is vendor-agnostic. In fact, we support more than 2,100 printer models and counting. Not only do we provide remote support for distributed organizations, but we also include prompt, nationwide onsite support for those times when your devices need hands-on intervention.

- Proactive monitoring and toner replenishment minimize downtime and maximize the use of your fleet
- Repair and preventive maintenance, including maintenance kits and replacement parts
- One point of contact for your entire distributed organization, accessible via phone or secure online portal

**MPowerPrint Benefits**

- Improved printer availability
- Onsite service — Field Service Personnel in every major metro area
- Print cost visibility and predictability
- Proactive consumables replenishment
- Improved employee productivity
- Scheduled strategy reviews

Each MPowerPrint engagement is customized to an organization's unique print environment and business needs. We provide real, tangible data about your print fleet. Through our secure customer portal, ServiceCOMMAND, you can submit service requests, view history and trends, and see which devices are under contract. Our advanced monitoring tools help us deliver strategic fleet planning, proactive service and consumables replenishment.

MPowerPrint deliverables:
- Free print environment assessment
- Optimization strategy recommendations
- Periodic strategy consultations
- Toner cartridge recycling program

An MPowerPrint engagement begins with an assessment of your total print environment and current support methodology. We capture the following details:
- Quantity of devices by type and model
- Variety of connectivity methods/stand-alone
- Value of toner inventory
- Toner replenishment process
- Physical map of printer locations
- Current maintenance and support response plan
- Review of lease agreements and renewal/expiration calendar

With this data, we design and implement a business strategy and print management processes that make sense for your particular business needs.

The MPowerPrint service maps your complete print environment by device location and enables detailed tracking of assets, users, jobs, and more.

Printing is typically the third largest office expense

90% of companies don't manage print volume or expenses

10 thousand Number of pages a typical office worker prints annually

70% of used print cartridges are not recycled
“Now I have a big picture of our printer inventory and the number of support calls we’ve had on each. Our account manager recommends what we can do to reduce costs. We can identify printers near the end of their lifecycle and justify replacement. We have pages of insight, so we can manage our assets more effectively.”

Kris Hopkins, Vice President of IT, Echo Group, Inc.
“Since moving to Managed Print Services, we are saving money on our toner costs and I don’t have to do any asset tracking on our printer fleet. It’s all done automatically and everyone in the MPS department is incredibly knowledgeable.”

Lindsay Hammond, Vice President of IT, Southern Hills Community Bank

### Simple Pricing Model

In an MPowerPrint service agreement, all parts, toner, labor, shipping, and support are factored into the cost per page. For budgeting and accounts payable purposes, our customers enjoy having no surprise costs, especially when it comes to the high cost of technical labor, consumables, and parts.

### Local Expertise for All Locations

We employ a nationwide, centrally-managed team of Field Service Personnel (FSP) who deliver onsite service in every major metropolitan area. A customer can request service using a dedicated telephone number or our secure web portal. We provide consistent, high quality service with customized local inventory.

### Other Services Available

#### Additional Hardware Service and Support

With STS, use one point of contact for all hardware management, maintenance and upgrades. We support servers, workstations, thin clients, data communication devices, printers, image scanners, and Scantron proprietary hardware. Choose a level of service that meets your business requirements: onsite, depot, or advance exchange.

#### Highly Accountable Managed IT Services

Relieve your existing IT team from routine tasks—patching, antivirus/malware control, backup management, and more—to allow them to concentrate on value-adding programs and projects. STS brings to bear a seasoned methodology honed over decades. We employ FSP—not contractors—trained on our principles and practices, using our tools, who work closely with our Network Operations Center team to provide seamless support.

#### Implementations

Our solution design experts and strategically located implementation specialists can create custom hardware and software solutions when you need upgrades, additions or reconfigurations.

#### Industry Partnerships

We pair our infrastructure support with our partners’ software support for a seamless experience that ensures that your solutions work together and eliminates finger-pointing between technologies.
