

Learning Objectives

Course Evaluation Special Feature

As colleges and universities move to incorporate the achievement of student learning objectives into criteria for state funding, institutions are looking for ways to measure this crucial aspect of learning and student satisfaction. Scantron's Class Climate provides a thoroughly researched feature, so you can measure the attainment of identified learning outcomes via your course evaluation process.

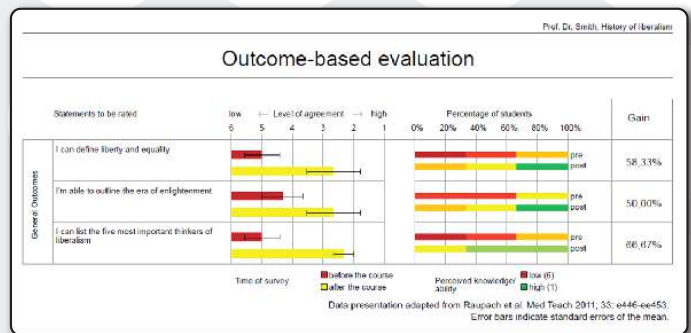

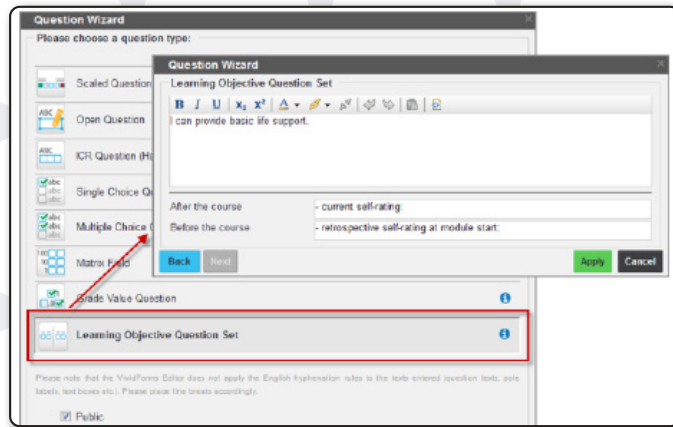

Measuring learning objectives supports a variety of institutional needs:

- Institutional effectiveness
- Assessment of programs (beyond classroom testing)
- Accreditation/Reaffirmation
- Departmental goals
- Benchmarking to track improvement

Learning outcomes in Class Climate incorporate this measure into a process you're already using—your course evaluations!

- Collect learning outcomes using a special dual-scale question structure, so you can measure outcome topics before and after course completion.
- Define a catalog of learning objectives for each course, so you can measure consistently.
- Add unique learning objectives, defined by instructors, so you can cover individual instructor goals.
