

Tailored Solutions

Data capture that meets your unique needs

A tailored Scantron solution starts with a standard base crafted using decades of expertise. Just like customizing a cup of coffee, we can add elements that take our reliable and accurate base application and make it your own, suited to your unique tastes and requirements. Scantron's tailored data capture solutions can help.

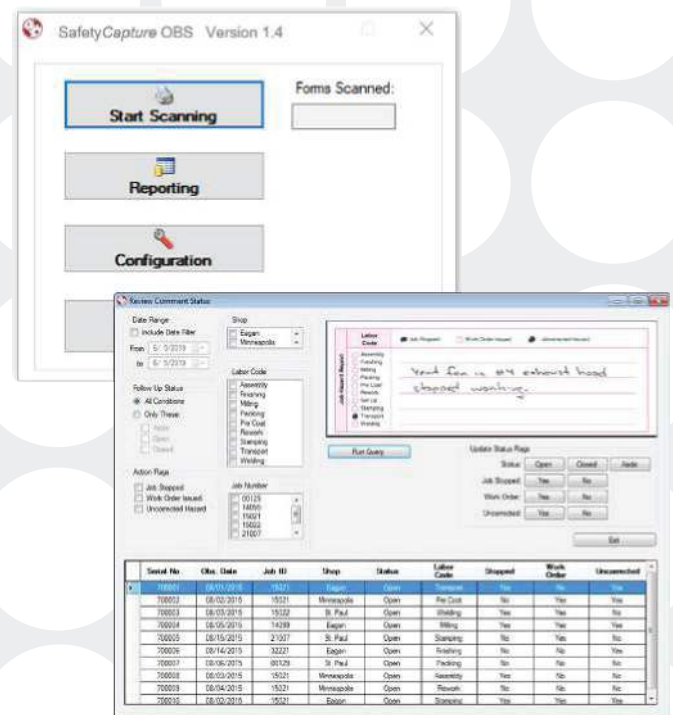

Start With the Base, Then Add What You Need

Sometimes “one size fits all” doesn’t. Off-the-shelf solutions can seem like the right path, but when you use them, the limitations become clear. You need a solution that combines the ease and value of off-the-shelf with the tailored details of a unique solution.

Your Requirements, Our Expertise

Using decades of expertise in data capture, we employ a field-tested consulting methodology to discover your requirements and propose design solutions. We go beyond data capture to streamline your workflows, bring vital information to the forefront, and empower you to make decisions.

- Reduce or eliminate repetitive, manual steps
- Make data capture easy with a one-button approach
- Eliminate extensive training and mitigate natural personnel turnover
- Slash the time and effort to go from raw data to qualified, usable information

**GET THE RESULTS YOU NEED
TO MAKE INFORMED BUSINESS
DECISIONS TODAY!**
