

# Moodle™ Integration

## Learning Management System Course Exam Connector

EvaExam's Moodle integrations make it more convenient for students and instructors to access their course exams from their Moodle home page. The integrations are available as a Learning Tools Interoperability (LTI) connector and a block.

### LTI Connector

Together, Class Climate and the Moodle LTI connector work to make it convenient for students to take online exams.

The **student portal** provides each student with a list of their open online exams.

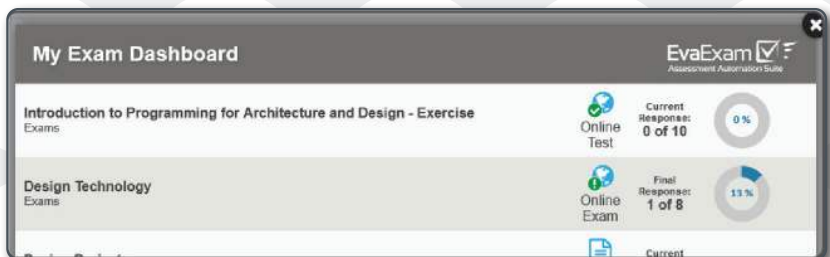

Each exam opens in a new browser window. After students complete an exam, the window displays which exams they have completed and which are pending, so they can complete all their exams in one sitting.

The **instructor portal** provides a list of each instructor's classes, showing the exam completion rate and providing access to the most current results report.

## Moodle Block

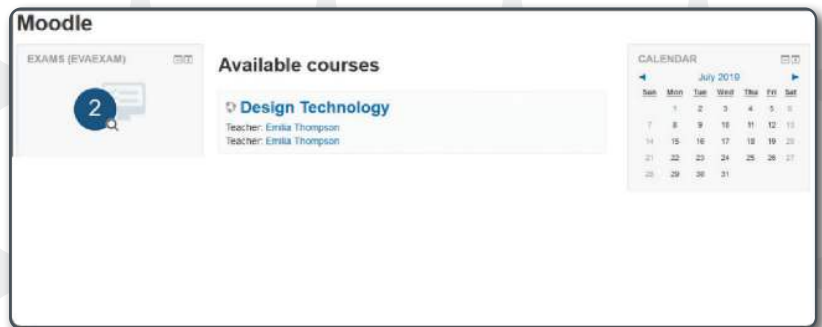

Together, Class Climate and the Moodle Block work to make it convenient for students to take EvaExam tests.

The **student portal** pops up a reminder after login for each student.

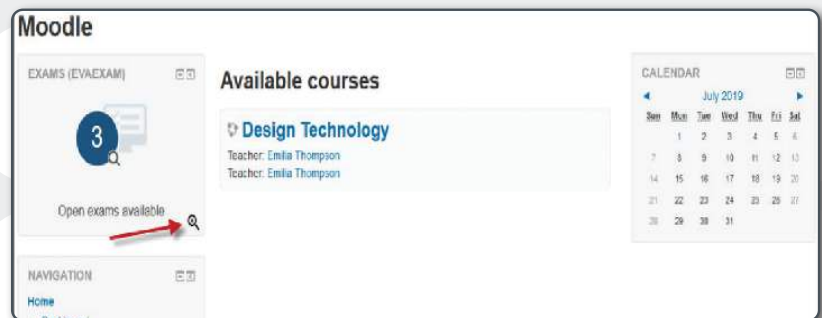

The block displays a list of a student's open online tests. Each test opens in a new browser window. After students complete a test, the window displays which tests they have completed and which are pending, so they can complete all their tests at once.

The **instructor portal** provides a list of each instructor's classes, showing the test completion rate and providing access to the most current results report.
