

Email Security Bundle

Reduce Risk and Improve Security

Minimize errors that lead to cybersecurity incidents and breaches—continuous education and cyberattack training featuring phishing simulation is proven to positively change user behavior. Scantron Technology Solutions regularly works with organizations to help educate and inform staff about how to better identify malicious emails and prevent successful phishing attacks.

Security Awareness Training

93% of successful security breaches start with phishing. If you're like most organizations, you want to believe that your employees wouldn't fall for an email phishing scam. However, cybercriminals use this tactic because it works.

Make employees the most valuable cybersecurity asset of the organization with tools and training to detect:

- Phishing emails
- Scams
- Credential theft
- Spoofed emails

With regular end-user training, organizations can significantly reduce risk, decrease successful attacks, protect their reputation by experiencing fewer breaches, and secure their overall cybersecurity investment.

Cybersecurity Consulting

Scantron has cybersecurity experts to ensure your organization is safe and prepared to counter cybersecurity threats. Our consulting is fully customized to your needs and scalable to any size or type of organization.

Use consulting hours for:

- Email security assessment
- Cybersecurity policy review
- Security education
- Strategic security planning
- Other cybersecurity needs

The Email Security Bundle from Scantron Technology Solutions

Scantron's Email Security Bundle is a two-part offering that pairs our Awareness Training program with a consulting package. The program includes:

- Phishing simulation tool and portal
- Online Security Education and LMS
- Reporting and Analytics
- Training on portal and security education
- Individual campaign setup, results, and review

The bundle includes consulting hours you can use to improve organizational security.
