Remote Workforce Solutions

Secure Options for Your On-Site, Remote, or Traveling Workforce

As workplace needs change, many companies are expanding their remote workplace plans. That's why Scantron created the Remote Workforce bundle, a suite of hardware and services specially designed to support your workforce with a secure infrastructure, whether they're on site, working remotely, or traveling.

Remote Workforce Security

Enabling employees to work from anywhere is a crucial part of maintaining operations no matter the circumstances. Remote working can ensure business continuity during pandemics, natural disasters, or other adverse conditions.

Consider the complete remote working environment:

- **How secure are the wireless networks that employees are using at home or when traveling?**
- **Are employee devices hardened against theft or cyberattacks?**
- **When employees return to the office, are your systems prepared to trap and defend against incoming security risks?**

An effective remote workforce strategy is more than "sending employees home with laptops." It requires a thoughtful, systematic approach to ensuring remote devices—and your core business systems—are protected from foreseeable outside risks.

The Remote Workforce Bundle from Scantron Technology Solutions

Scantron's Remote Workforce bundle minimizes technology risks by providing secure infrastructure support and device hardening no matter where your staff works: on-site, at home, or traveling.

We're all tasked with doing more with less these days. Ensuring the highest level of service is critical to keep your business charging ahead.

Scantron Technology Solutions has been on the front lines with managed technology solutions before and throughout challenging times, meeting and exceeding client expectations—and we'll continue being there for you no matter what lies ahead.

Comprehensive Remote Workforce Environment

Secure Infrastructure

Hybrid Worker Support: on-site, home, or traveling

Company-Owned Assets and Bring-Your-Own-Device (BYOD) Personal Equipment

Staff Up and Down Seamlessly

A solid remote workforce approach provides more than support for current employees. Consider new, seasonal, or temporary workers:

- **Can you bring these employees on board rapidly and securely, with minimal effort?**
- **Do you have an economical plan for the additional hardware and software licenses?**

Our Remote Workforce bundle provides an extra benefit for on-boarding additional staff.

You don't have to expand your IT team to expand your workforce—let Scantron be an extension of your resources.

Remote Workforce Options
To Support Your Exact Needs

	Bronze	Silver	Gold*
